Objective

Artificial Intelligence & Data Science student with hands-on experience building AI-powered backend systems, REST APIs, NLP pipelines, and LLM-based applications. Passionate about developing secure AI workflows, automation tools, and intelligent backend services that solve real-world problems. Interested in AI systems, offensive security, developer tooling, and building scalable applications using Python and modern AI technologies.

Education

- **REVA University** — Bengaluru
  B.Tech in Artificial Intelligence and Data Science — CGPA: 9.0 — *2023 – 2027*
- **St Claret Pre-University College** — Bengaluru
  Physics, Chemistry, Mathematics, Computer Science — 83% — *2021 – 2023*
- **Bishop Cotton Girls School** — Bengaluru
  ICSE / High School Education — 80% — *2011 – 2021*

Skills

- **Programming**: Python, JavaScript, TypeScript, SQL, HTML5
- **Backend**: Flask, REST APIs, Node.js
- **AI Engineering**: LLMs, Prompt Engineering, Retrieval-Augmented Generation (RAG)
- **Machine Learning**: TensorFlow, Scikit-Learn, Pandas, NumPy, OpenCV, PySpark
- **Developer Tools**: Git, GitHub, Power BI
- **Security**: Prompt Injection Defense, Threat Analysis, Secure AI Systems, Phishing Detection

Projects

- **AI Security Gateway – LLM Prompt Injection Defense Platform** 2025
  - **LLM Security**: Designed and developed a Python-based security gateway to detect and mitigate prompt injection attacks targeting Large Language Models (LLMs).
  - **Threat Detection**: Implemented NLP-driven prompt sanitization, adversarial prompt classification, and response filtering mechanisms to improve AI system security.
  - **Backend Engineering**: Built modular backend components using FastAPI and REST APIs to support secure AI inference workflows and extensible security integrations.
- **Cybersecurity Toolkit – Security Automation Suite** 2024
  - **Developer Tooling**: Developed a Python-based cybersecurity toolkit featuring password strength analysis, cryptographic utilities, and interactive security simulators.
  - **Backend Development**: Implemented backend security workflows and reusable Flask modules to automate common security tasks and improve operational efficiency.
  - **Secure Engineering**: Applied secure software development principles while designing modular utilities for cybersecurity education and security awareness.
- **TrustScore AI Lens – AI-powered Phishing Detection Platform** 2025
  - **Machine Learning**: Developed supervised machine learning models for phishing detection, fake review classification, and AI-generated spam detection with up to 92% accuracy.
  - **NLP Pipeline**: Performed text preprocessing, feature engineering, and behavioral profiling across more than 1,000 structured and unstructured text samples.
  - **Security Automation**: Built automated trust-scoring workflows that generated real-time security risk assessments for suspicious online activity.

Achievements

- **Hackathons**: 1st Place – Intra Department Psychology Hackathon
  2nd Place – NammaHack GDGoC Hackathon

Certifications

- **Cisco Networking Academy**: AI Technical Practitioner (AITECH)
- **IBM SkillsBuild**: Cloud Computing Fundamentals
- **Palo Alto Networks**: Cybersecurity Fundamentals
- **Cisco Networking Academy**: Cybersecurity Basics

Leadership

- **Google Developers Group On Campus, REVA University** 2025 – Present
  Member
  - **Collaborated on AI, software engineering, and hackathon initiatives with student developers through workshops and technical events involving 300+ participants.**:
  - **Contributed to collaborative learning activities focused on emerging technologies and software development practices.**:
