Summary

Undergraduate of AI & Data Science, with hands-on experience in Python, machine learning, NLP, and Generative AI applications and projects. Experienced in working with LLM-powered security solutions, building REST APIs, and implementing text classification pipelines using machine learning. Interested in LLM integration, prompt engineering, AI automation, cybersecurity and developing practical AI solutions through experimentation and prototyping.

Experience

Seconize Technologies Aug 2026 – Oct 2026
Software Engineer Intern *Bengaluru, India*

- Developed an LLM-powered API security testing tool to identify and validate REST API vulnerabilities against the OWASP API Security Top 10, with automated test generation, risk assessment, and security report generation.
- Resolved **30+ bugs** and addressed assigned issues across **frontend and backend** components, delivering fixes within 4-week sprints.

KratosCloud Consulting June 2026 – Aug 2026
Project Intern *Bengaluru, India*

- Developed and tested software to connect **Raspberry Pi** devices with backend services, handling device setup, communication, and hardware–software integration.

Projects

AI Security Gateway – LLM Prompt Injection Defense Platform 2025

- Developed a Python-based AI security gateway to detect and mitigate prompt injection attacks using NLP-based prompt analysis, input sanitization, and response filtering.
- Implemented modular backend services using FastAPI and REST APIs to integrate AI security checks into LLM-powered application workflows.

TrustScore AI Lens – AI-Powered Phishing Detection Platform 2025

- Built supervised machine learning models for phishing detection, fake review classification, and spam detection, achieving up to **92% accuracy**.
- Developed an NLP pipeline for preprocessing, feature engineering, and classification across **1,000+ text samples** to support automated trust scoring.

Clarity AI – Digital Wellness Platform *Python, NLP, LLM APIs*

- Developed an AI-driven application for detecting misinformation, emotional reasoning, and logical fallacies in online content.
- Integrated NLP techniques and cloud-based LLM APIs to analyze textual data and generate contextual insights for informed decision-making.

Skills

- **Languages**: Python, Java
- **AI/ML**: scikit-learn, Pandas, NumPy, PySpark, OpenCV, Claude, Ollama
- **AI Engineering**: LLM Integration, Prompt Engineering, NLP
- **Frameworks**: FastAPI, Flask, Angular, React.js, Streamlit
- **Tools & Platforms**: Git, GitHub, Docker, Linux, Kali Linux, VMware, Postman, Power BI
- **Databases & APIs**: SQL, Postgres SQL, REST APIs, OpenAPI/Swagger

Education

REVA University 2023 – 2027
B.Tech in Artificial Intelligence and Data Science | CGPA: 8.00 *Bengaluru, India*

- **Leadership & Involvements:** Member, Google Developer Groups on Campus (GDGoC) REVA – workshops, hackathons and tech events with **300+ participants**.

Achievements & Certifications

- **Hackathons**: **1st Place** – Intra-Department Psychology Hackathon; **2nd Place** – NammaHack GDGoC Hackathon
- **Certifications**: Cisco AI Technical Practitioner (AITECH), Cisco Cybersecurity Basics, Palo Alto Networks Cybersecurity Fundamentals, IBM SkillsBuild Cloud Computing Fundamentals
