

RUHI SHARMA

Bengaluru, India

✉ ruhiskz.sharma@gmail.com —  LinkedIn —  GitHub —  Portfolio

Summary

Artificial Intelligence Data Science undergraduate with strong interest in Cybersecurity, Secure Software Development, and Python-based automation. Experienced in building security-focused applications involving threat detection, phishing analysis, prompt injection defense, NLP, and risk assessment systems, with a focus on developing secure and scalable solutions.

Technical Skills

Programming Languages: Python, SQL, JavaScript, HTML, CSS

Cybersecurity: Phishing Detection, Threat Analysis, Prompt Injection Defense, Risk Assessment, Security Testing

Python Technologies: Flask, Pandas, NumPy, PySpark, MLlib, REST APIs

AI Security: NLP, Prompt Engineering, Cloud-based LLMs, AI Safety

Tools: Git, GitHub, Jupyter Notebook, VS Code, Streamlit

Concepts: OOP, Agile Development, Network Security Fundamentals, Data Analytics, Problem Solving

Projects

AI Security Gateway – Prompt Injection Defense

Python, Flask, LLM Security

- Designed a Python-based security gateway to detect and mitigate prompt injection and jailbreak attacks targeting large language models.
- Implemented threat classification, input sanitization, and response filtering mechanisms to improve AI system security.
- Applied secure software development principles to reduce risks associated with malicious inputs and data leakage.

TrustScore AI Lens

Python, NLP, Behavioral Profiling

- Developed a Python-based cybersecurity platform capable of detecting phishing attempts, fake reviews, and AI-generated spam.
- Implemented NLP-driven trust scoring and behavioral profiling techniques for threat detection and risk assessment.
- Designed real-time analysis workflows to identify suspicious online activity and social engineering patterns.

Cybersecurity Toolkit

Python, Flask, Cryptography

- Built a Python and Flask-based toolkit featuring password strength analysis, cryptographic utilities, and security simulators.
- Implemented automated security checks and vulnerability awareness modules demonstrating common cybersecurity concepts.
- Applied cryptography and secure coding principles to strengthen application security.

Clarity AI – Digital Wellness Platform

Python, NLP, LLM APIs

- Developed an AI-driven system for detecting misinformation, emotional reasoning, and logical fallacies in online content.
- Integrated NLP techniques and cloud-based LLM APIs to analyze textual data and generate contextual insights.
- Applied data analysis and AI reasoning techniques to support informed decision-making.

Education

REVA University

Sept 2023 – Present

B.Tech in Artificial Intelligence and Data Science

Bengaluru, India

- Relevant Coursework: Object-Oriented Programming, Machine Learning, Database Management Systems, Image Processing, Cryptography, Network Security, Data Structures.

Leadership & Activities

Entrepreneurship Club, REVA University

Sept 2024 – 2025

Secretary

Bengaluru, India

- Coordinated startup expos, entrepreneurship events, and outreach campaigns involving 100+ participants. Led marketing and promotional activities to increase student participation.

Cultural Club, REVA University

2025 – 2026

Associate

Bengaluru, India

- Assisted in organizing cultural events, student engagement activities, and campus-wide programs. Collaborated with organizing teams to coordinate logistics, promotions.
